If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Cause of the leak- SWD pump was down due to electrical problem (blown fuse) and a valve was also left open on unloading station. Pumper shut valve upon arrival to stop leak and electrician fixed blown line fuse to get pump back online.

Describe Area Affected and Cleanup Action Taken.*

Affected area- Secondary containment and southwest side of well pad surface (entire pad has 2' earth berm). Vacuum truck moved in and recovered all standing fluid inside the secondary containment and on the bermed pad surface. Contaminated soil on pad surface will be removed and hauled to an approved NMOCD disposal site.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
