NATURE OF RELEASE

Type of Release	Produced water and crude oil	Volume of Release	5 bbls of produced water and 5 bbls of crude oil	Volume Recovered	0
Source of Release	2 7/8" flow line	Date and Hour of Occurrence	8/17/11, Hour unknown	Date and Hour of Discovery	8/17/11, 1:30 a.m.
Was Immediate Notice Given?	Yes No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			
If a Watercourse was Impacted, Describe Fully.*					

RECEIVED
 JAN 04 2012
 NMOCD ARTESIA

Describe Cause of Problem and Remedial Action Taken.* A flow line near well PLU-108 developed a leak. The well was shut in until daylight hours. 3 sections of pipe were replaced the next morning.

Describe Area Affected and Cleanup Action Taken.* The release affected an area of pastureland measuring approximately seven hundred square feet (700 ft²). During the site assessment, it was noted that the spill initially reported as the Poker Lake Unit #108 was actually on a flow line from Poker Lake Unit #84. It was also noted that there were at least twelve (12) clamps on the four (4) flow lines that run along the side of the lease road to/from the following pumping wells: Poker Lake Units #84, #105, #111, and #118. The flow path of the August 17, 2011, release noted as Poker Lake Unit #108 mingled with historical releases from these flowlines. Since the area affected by the August 17, 2011, release is indistinguishable from that affected by the historical releases, the releases were remediated simultaneously, in accordance with NMOCD and BLM guidelines. Please reference the attached *Remediation Summary & Risk-Based Site Closure Request* for remediation details.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
