13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

TD-2402' PBTD-2392' Perfs-2294-2372'

OXY USA Inc. respectfully requests to temporarily abandon this well for two years. This well is currently being evaluated for water injection performance before we continue with the water injection program. It will be necessary to identify what sandstones layers are responding to the water injection. Probably will need to run Saturation logs to isolate watered layers or open additional layers with good saturation, in order to optimize the production.

1. RIH & set CIBP @ +/-2244', dump bail 4sx cmt to +/- 2209'
2. Notify BLM/NMOCD of casing integrity test 24hrs in advance.
3. RU pump truck, circulate well with treated water, pressure test casing to 500# for 30 min.
