If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

On the Union 35 Fed Tank Battery static electricity caused the produced water tank to explode and catch fire. 117 BBL of produced water spilled in containment and 117 BBL recovered of produced water along with 133 BBL of rain water and water from fire department

Describe Area Affected and Cleanup Action Taken.\* Union 35 Fed Tank Battery. Delaware Basin BU. Assistant Foreman was contacted at 6:15 pm concerning a fire at the Union 35 Battery. Lease operator preceded to the location arriving at 6:30 pm. Upon arrival the produced water tank was completely burnt. The fire department from La Huerta was already on scene and were in the process of extinguishing the fire. Assistant Foreman had arrived and was in the process of shutting in the four pumping units that flow to the battery. The lease operator preceded to shut in the vessels on location. The fire department finished extinguishing the fire and left location. Two vacuum trucks were dispatched to begin the cleanup process. The trucks recovered 250bbbls of produced water/rain water.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
