The flow line developed a leak due to corrosion, a temporary leak clamp was placed on the affected area until the well could be shut down and a joint of pipe replaced.

Describe Area Affected and Cleanup Action Taken.\*  
The spill impacted approximately 1,020 sq.ft. of pasture. All of the free standing fluid was picked up with a vacuum truck. The stained area was left as is pending the final remediation. The spill area will be cleaned up in accordance to the NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
