Describe Cause of Problem and Remedial Action Taken.* Hole on the bottom or side of the oil tank. The remaining oil in the tank will be removed to repair or replace tank.		
Describe Area Affected and Cleanup Action Taken.* The spill occurred inside the facility firewalls. The impacted soil was removed and hauled to proper disposal. Tetra Tech collected confirmation samples and showed samples below the RRAL for TPH and BTEX. The chloride concentrations were not an environmental concern. The excavation was backfilled with clean soil. A closure report has been prepared and submitted to the NMOCD and BLM for review and approval.		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
