ARTESIA DISTRICT
JUL 14 2015
RECEIVED

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
A loadline valve was left open and leaked 18 bbls of produced water onto the ground. No fluids were recovered and the valve was properly closed.

Describe Area Affected and Cleanup Action Taken.*
The affected area is approximately 135' x 65' with most of the leak staying inside the lined battery on location. A small area measuring 6' x 75' leaked just north of the lined facility. Remediation will be completed according to a remediation plan approved by both the BLM and NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
