If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite ☒ offsite ☐ If offsite, name of facility _____. (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☒ Yes ☐ If yes, show depth below ground surface _____ ft. and attach sample results. (5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments:
The buried pit contents will be re-excavated to a depth where representative samples of the sides and bottom of the excavation indicate all soils with TPH levels above 5000 ppm have been removed. The original pit area will also be re-excavated to a depth where representative samples of the sides and bottom of the excavation indicate all soils with TPH levels above 5000 ppm have been removed. A trench will be installed. The trench will be lined with a 12-mil impervious liner and the excavated material will be placed on top of the liner and encapsulated with a 20-mil impervious liner. The trench will be covered and contoured with three feet of soil or like material capable of supporting native plant growth to prevent erosion and ponding of rainwater. The excavated areas will be backfilled with clean soil and all of the areas will be reseeded in the spring

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
