**Describe Cause of Problem and Remedial Action Taken.\***

A stainless steel fitting on the salt water disposal pump leaked at the connection to the ball valve releasing approximately 10bbls produced water. All valves on the stainless steel line connected to the pump were immediately closed to stop the release. The stainless steel fitting on the salt water disposal pump has been repaired.

**Describe Area Affected and Cleanup Action Taken.\***

The spill was approximately 10' x 15' area located on the Southwest corner of the location next to the salt water disposal pump. 10bbls produced water was released and 8bbls were recovered with no fluid leaving location. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
