Leak on the Lact Unit caused a 5 bbl oil spill. Well was shut in to prevent further release. Still investigating where the leak started due to the snow.

**Describe Area Affected and Cleanup Action Taken.\***  
5 bbls oil was released on the South, South West side of the facility. None of the spill was recovered due to weather. Size of affected area is 20' x 30'. All fluids remained on the location. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
