13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Burnett is requesting to change the Production Hole size from 8 3/4" and 7 7/8" to a 8 1/2" hole from under the 9 5/8" casing to MDTD. The production casing size will not change.

The justification for this is to improve efficiencies and saves dollars by eliminating one of the reamer runs. This method has been implemented and run on the vast majority of all wells drilled by Apache in this area in 2015.
