As the surface owners of Kobe 22 State #1 well, we are informing you that Cardinal Laboratories conducted the five-point composite sample pit contents test to determine if the specified concentrations for in-place burial of the pit meet the OCD parameters.

Because the test results meet or were less than the OCD parameters (see attached test results), this letter is to inform you that we will start the on-site closure operations of the pit on Thursday, November 12, 2015. The on-site burial of the pit will be in compliance with the OCD's protocols and procedures based upon the appropriate requirements of 19.15.17.13 NMAC. Please note this letter, along with Cardinal Laboratories test results, were also faxed today (11/10/15) to the OCD office in Artesia.

If you have any questions or need further information, you can contact me at the numbers listed above or by e-mail at eyates@jalapenocorp.com.
