If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Hole in fire tube in heater treater caused leak into secondary containment. Excess fluid was vacuumed up. Soil samples will be collected at various depths and remediation will be performed.

Describe Area Affected and Cleanup Action Taken.*

Leak was contained in containment area. Excess fluid was vacuumed up and removed. After lab results are obtained, contaminated soil to be removed and replaced with uncontaminated soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
