In accordance with our phone conversation of 5/16/2016 with Randy Bayliss, and additional conversations with Paul Kautz in Hobbs, NM, Concho Resources requests relief from requirements to set an additional string of 13 3/8" casing @ 450' on the Clydesdale 1 Fee #5H, #6H, #7H, #8H wells. We are in agreement that the 8 5/8" casing set to approximately 1250' is sufficient in providing hydraulic isolation between the two aquifers in areas where both are present. It only takes approximately 1 day to drill, case and cement the entire interval to 1250'. Additionally, the requirement of 13 3/8" casing is an extra expense and is counter-productive as it would prevent future conversion to a shallow water well.
