If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
A centrifugal pump seal and stuffing box failure resulted in the release of 500bls of produced water into a lined containment. Vacuum trucks were utilized to recover all of the fluid within the containment.

Describe Area Affected and Cleanup Action Taken.\*  
The fluid inside of the affected area, held within the lined containment was removed utilizing vacuum trucks. The stained areas on the location noted by SLO were not related any release meeting NMOCD reporting guidelines of at least 5bbls of fluid. However the stained areas on the location were scraped up utilizing a backhoe in routine housekeeping operations. The stained soil from these areas will be disposed of at a NMOCD approved solid waste disposal facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
