13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Cimarex Energy respectfully request approval to lay approximately 1000' of on lease 4", SDR-11 surface flowline down the existing lease road from our Grynberg 11 Federal Com #4 well in the NW4 NW4 Sec 11, T-25S, R-26E to the SWD flowline located in the S2 NW4 Sec. 11, T-25S, R-26E. The route has been previously arc cleared.

Pipe has a MAOP of 250 psi and anticipated working pressure of 60 to 80 psi. This route will allow disposal of produced water from our well to the SWD and limit truck traffic in to the battery.

Along same existing and arc cleared lease road construct 1000' of 480 volt, 4 wire, 3 phase, 4 spans of 40' poles, raptor spec e-line from the above mentioned well to the e-line truck in Sec. 11.

Accepted for record - NMOCD
