Describe Cause of Problem and Remedial Action Taken.\*  
A hole developed in the separator due to age. The separator will be repaired tested and put back into operation.

Describe Area Affected and Cleanup Action Taken.\*  
The release was contained within a lined facility. A vacuum truck was dispatched to remove all freestanding fluids. The containment will be cleaned and the facility will be put back into operation. Concho will have the spill site inspected for any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
