Describe Cause of Problem and Remedial Action Taken.*

Due to vibration from the horizontal pump the clamps on the suction flex hose connected to the pump became loose causing the flex hose to loosen at the connection. The line was immediately isolated to stop the release. Repairs are scheduled to be completed.

Describe Area Affected and Cleanup Action Taken.*

Approximately 21bbls produced water was released into surrounding cement containment overflowing out of containment onto location and into the pasture. Approximately 10bbls produced water was recovered from cement containment with 0bbls produced water recovered from location or pasture that had overflowed from containment. The produced water that overflowed from the cement containment flowed in a Southern direction affecting an area approximately 22'x22' on location and traveled South into pasture affecting an area approximately 14"x370'. An environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
