Describe Cause of Problem and Remedial Action Taken.*

The seal on the Triplex plunger pump became loose resulting in a release of 8 BBLs produced water. The suction lines were isolated immediately to prevent further release. The Triplex plunger pump has been repaired.

Describe Area Affected and Cleanup Action Taken.*

8 BBLs produced water was released from the Triplex plunger pump onto the ground. The area affected was on the Southwestern portion of the pad. All released produced water was contained on pad. None of the released fluid left pad. Vacuum truck recovered approximately 8 BBLs of produced water and 62 BBLs of rain water on location. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
