Describe Cause of Problem and Remedial Action Taken.*
Due to corrosion on the bottom of an oil tank a hole developed. The oil in the tank was immediately transferred to a different tank in the battery to stop the release. The tank has been taken out of service until repairs can be made.

Describe Area Affected and Cleanup Action Taken.* Approximately 80bbbls of oil was released in to lined containment. A vacuum truck was dispatched and recovered all 80bbbls from the lined containment. The liner was checked for holes and none were found. No further action is necessary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
