13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

R&S has engaged in a recompleation attempt on the Toles Fed #1. We have added new perforations and included formation stimulation in zones just above the original Morrow completion. While those results are not promising, we do have an additional zone in the upper portion of the wellbore that we desire to investigate. Currently we have frac tanks on location but nothing over the hole as we are awaiting the recompleation of another well by our consultant. Upon his availability we endeavor to recompleate the Toles Fed #1 in the upper zone.

We anticipate that we will be back on the well on or before the 15th of March, 2017.
