Underground Injection Control Program
"Protecting Our Underground Sources of Drinking Water"

September 6, 2017

MNA ENTERPRISES LTD CO
106 W. Alabama
Hobbs, NM 88242-8242

Dear Operator:

An LOV was issued on August 15th, 2017 by the OCD – Artesia District Office instructing you to shut in three Saladar Federal injection wells and the Russell 35 Federal 002 SWD well. This letter rescinds that order for the Saladar Federal #4 (3001502446). Saladar Federal #8 (3001502449) and the Russell 35 Federal #2 (3001505891). You may return these 3 wells back to injection.

The Saladar Federal #12 well has been out of compliance since August 25th, 2015 due to a failed MIT pressure test. That well must remain shut-in and must be disconnected from the injection line.

The OCD will begin working on a compliance case against MNA Enterprises LTD Co to address the following wells:

Saladar Federal 012	3001524179	Out of compliance since 8/25/2015 due to failed MIT.
Saladar B 001	3001502451	No oil production has ever been filed for this well.
Saladar B 002	3001502450	Out of compliance since 11/10/2008 due to failed MIT and last production report 12/2007.

You will be contacted by the OCD – Santa Fe office when a compliance case is issued.

Sincerely,

Richard Inge

Richard Inge, Compliance Officer
Artesia OCD District Office
