13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Devon Energy Production Company, LP as required by 43 CFR Section 3179.204, notice is hereby provided that this well underwent its first liquids unloading event by manual or automated well purging after the effective date of the cited provision. After consideration of the technical alternatives, costs, and increased risks to employee safety associated with those alternatives, in operator's engineering and economic judgment, operator determined that the best course of action was to unload the well under atmospheric pressure to re-establish production.
