FORM APPROVED
OMB No. 1004-0137
Expires: March 31, 2007

SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to re-enter abandoned well. Use Form 3160-3 (APD) for such proposals.

SUBMIT IN TRIPLICATE- Other instructions on reverse side.

1. Type of Well
 Oil Well Gas Well Other

2. Name of Operator
Pecos River Operating, Inc.

3a. Address
PO Box 1433, Rosewell, NM 88202-1433

3b. Phone No. (include area code)
575-622-1001

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)
660 FSL, 198 FWL, Section, 9 T7s, R26E

5. Lease Serial No.
NM 38342

6. If Indian, Allottee or Tribe Name

7. If Unit or CA/Agreement, Name and/or No.

8. Well Name and No.
Helen Collins Federal #3

9. API Well No.
30-005-62072

10. Field and Pool, or Exploratory Area
Pecos Slope Sbo

11. County or Parish, State
Chaves, NM

12. CHECK APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

| TYPE OF SUBMISSION | TYPE OF ACTION | | | |
|--|---|--|--|---|
| <input checked="" type="checkbox"/> Notice of Intent | <input type="checkbox"/> Acidize | <input type="checkbox"/> Deepen | <input type="checkbox"/> Production (Start/Resume) | <input type="checkbox"/> Water Shut-Off |

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Set CIBP @4080' and dump, or cmt on top to cober perforated interval. The hole will then be loaded with 9# Fluid pursuant to BLM Regulations. WOC TAG
Perf & SQZ @750' & attempt to get Circ. If not Circ, Perf SQZ holes @700' & attempt to get Circ around 5-1/2" after determining Circ or not, Perf SQZ holes @60'.
Plug added.
see COAs. plugs changed.

Depending on outcome of previous step;
IF NO CIRC @700'-750' fillcasing from 815' to surface inside & out of annulus
IF CIRC WAS OBTAINED AT 700'-750' pump a 50sx plug @815'; WOC & tag, if tag is below 715' repump and re-tag plug.

After plugging is complete, a dry hole marker will be installed.

WELL BORE DIAGRAM

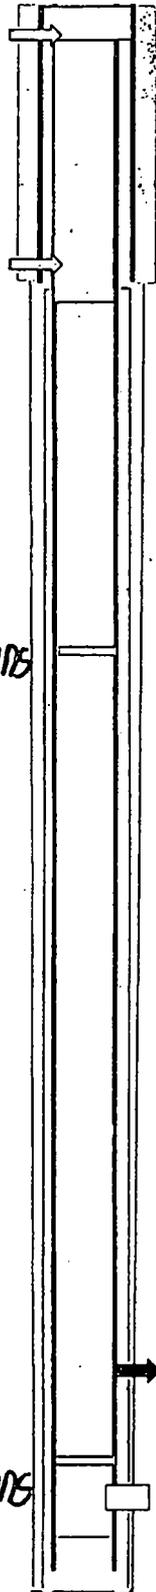

PROPOSED PLUG PROGRAM

Squeeze holes @ 60'

Either a Solid plug from 815 to Surface
OR

A plug from 815 tagged higher than 715'
and a plug from 60 to surface, inside and
out of 5 1/2".

Squeeze holes @ 765 and poss 700
If circulation through these holes is
not possible, it must be assumed that
there is cement behind the 5 1/2"

Helen Collins Fed #3

Formation Tops

San Andres 595'

8 5/8" 24# J-55 @ 765', 200 sx, Circulated

TOC by temp survey in 1982 @ 770'

Note, the second stage of the cement job pumped 1328 ft³ of cement, the annulus calculates to hold 644 ft³.
It is assumed that cement filled the entire annulus.

Glorietta 1692

DV Tool @ 3718, second stage 970 sx

Abo 4298

Perforations: 4132 to 4156

PBTD

5 1/2 17.5# J-55 @ 4300, 1st stage 100 sx

Pecos River Operating, Inc.
December 10, 2018
Conditions of Approval**

Work to be completed by March 10, 2018.

- 1. Operator shall place CIBP at 4,080' (50-100' above top most perf) and place Class C cement on top as proposed. WOC and tag NO LESS than 3660' to seal the top of the Abo and the DV tool.**
- 2. Operator shall place a balanced Class C cement plug from 1,762'-1,592' to seal the Glorieta formation. WOC and tag.**
- 3. Perf and squeeze as proposed.**
- 4. Operator shall set a balanced Class C cement plug from 815'-surface to seal the 8-5/8''shoe and salt formation. WOC and tag.**
- 5. See Attached for general plugging stipulations.**

General Requirements for Plug Backs

Failure to comply with the following Conditions of Approval may result in a Notice of Incidents of Noncompliance (INC) in accordance with 43 CFR 3163.1.

1. Plugging operations shall commence within ninety (90) days from this approval.

If you are unable to plug back the well by the 90th day provide this office, prior to the 90th day, with the reason for not meeting the deadline and a date when we can expect the well to be plugged back. Failure to do so will result in enforcement action.

2. **Notification:** Contact the appropriate BLM office at least 24 hours prior to the commencing of any plug back operations. Call 575-627-0205.

3. **Blowout Preventers:** A blowout preventer (BOP), as appropriate, shall be installed before commencing any plugging operation. The BOP must be installed and maintained as per API and manufacturer recommendations. The minimum BOP requirement is a 2M system for a well not deeper than 9,090 feet; a 3M system for a well not deeper than 13,636 feet; and a 5M system for a well not deeper than 22,727 feet.

4. **Mud Requirement:** Mud shall be placed between all plugs. Minimum consistency of plugging mud shall be obtained by mixing at the rate of 25 sacks (50 pounds each) of gel per 100 barrels of brine water. Minimum nine (9) pounds per gallon.

5. **Cement Requirement:** Sufficient cement shall be used to bring any required plug to the specified depth and length. Any given cement volumes on the proposed plugging procedure are merely estimates and are not final. Unless specific approval is received, no plug except the surface plug shall be less than 25 sacks of cement. Any plug that requires a tag will have a minimum WOC time of 4 hours.

In lieu of a cement plug across perforations in a cased hole (not for any other plugs), a bridge plug set within 50 feet to 100 feet above the perforations shall be capped with 25 sacks of cement. **Before pumping cement on top of CIBP, tag will be required to verify depth. Based on depth, a tag of the cement may be deemed necessary.**

Unless otherwise specified in the approved procedure, the cement plug shall consist of either Neat Class "C", for up to 7,500 feet of depth or Neat Class "H", for deeper than 7,500 feet plugs.

6. **Subsequent Plug back Reporting:** Within 30 days after plug back work is completed, file one original and three copies of the Subsequent Report, Form 3160-5 to BLM. The report should give in detail the manner in which the plug back work was carried out, the extent (by depths) of cement plugs placed, and the size and location (by depths) of casing left in the well. **Show date work was completed.**

7. **Trash:** All trash, junk and other waste material shall be contained in trash cages or bins to prevent scattering and will be removed and deposited in an approved sanitary landfill. Burial on site is not permitted.
