Erin,

The two Lone Tree Draw 14 13 State Com wells (#335H & #336H) APD's have been approved and have been scanned into the well file. **BUT**, I have also scanned the top page of the APD in a second time with this note listed on each of the APD's – "Well cannot be spud until new bonding requirements are met". We received an email from Cindy Chiba yesterday saying that the bonding should be received in SF today, but did this just to CYA. If you know what I mean! API numbers are 30-015-45637 (335H) and 30-015-45644 (336H).
