13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

OXY USA Inc. respectfully requests to amend the approved APD and change the well number for API No 30-015-45386 from the Sterling Silver MDP1 33-4 Federal Com #174H to the Sterling Silver MDP1 33-4 Federal Com #6H. Due to spacing changes this well will be drilled and completed in the 2nd Bone Spring instead of the Wolfcamp formation and the bottom hole is moving west 90' from the current location.

OXY USA Inc. is also requesting to drill 16" surface hole instead of the planned 17-1/2". We received verbal approval from Haque on 11/14/2018. Notes are below:

Below is the Sterling Silver well we discussed on the phone today regarding the change in surface hole size. The surface hole is being drilled as 16" OH x 13-3/8" CSG instead of 17-1/2" OH x 13-3/8" CSG (original design). The drilling crew attempted to spud the well with the 17-1/2" bit,

14. I hereby certify that the foregoing is true and correct.
