Dear Vonda,

I cannot approve your C-104 (Request for Allowable and Authorization to Transport). Please submit no later than November 13, 2006 the following regulatory information as there a number of items that is missing and incomplete.

Yours truly,

Bryan Arrant  
NMOCD  
District II Geologist  
Artesia, NM  
505-748-1283 ext. 103

*logs received 11/7/06*

*Received  
11/7/06*

Complete set of electric logs.

We have received the "Platform Express Three Detector Litho-Density Compensated Neutron/GR" log. However, this well was also logged with a Dual Laterolog (in combination with the above) and a cement bond log. A notarized well deviation report. Amended subsequent reports that correctly show the actual WOC time, the casing pressure tests for each string of casing and the time in minutes that tests were conducted.

If you have any questions please call.

Please refer to the following rules in NMOCD's rule book for more information available on our web site:

<http://www.emnrd.state.nm.us/ocd>.

**NMOCD rules: 19.15.1.12; 19.15.3.107; 19.15.3.111; 1105.**
