A successful Mechanical Integrity Test was performed on the referenced well on 12/21/06 and the original chart was retained by the NM OCD, District II. A CIBP was set 1570'.

This well is in our waterflood area. The well therefore has utility should additional intervals in the San Andres be perforated and flooded. As the ASAU is expected to produce for quite some time, the potential usefulness of this well will also be ongoing. As this situation is not expected to change, we are requesting a longer term temporary abandonment status.

Temporary Abandoned Status Approved
Until 12-21-11

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOC guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
