(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Chevron requests approval to install a 2 7/8" schedule 40 (pressure rating of 1910 psig) carbon steel flowline from the Neff 13 #17 well site to the Neff battery. Chevron also request approval to install a electric power line from the main power line to the Neff 13 #17 well site. The flowline will normally operate at a pressure of 50 psig and will run northeast in section 13 parallel to CO Rd.#798. The flowline will then tie into an existing flowline 4258 feet from the well location, before traveling under the road through an existing roadbore before heading east to the Neff battery. I've included a survey plats and an Arch. surveys for your convenience.

14 I hereby certify that the foregoing is true and correct
