13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum plans to workover and possibly recompletable this well as follows: Release packer and RBP and POOH with the tubing and tools. Perforate additional Bone Spring 7848'-7860' (25), 7870'-7876' (13) and 8112'-8128' (33). Stimulate as needed. Set an RBP at +/-8400' set packer and test the RBP. Move the packer up to 7800' and swab test all perforations, if we get a fracable show POOH with rubbing and packer and dump 5 sx of sand on RBP. Flow the well back if it will flow, if it will not flow, TIH with tubing to wash sand and pull the RBP. Consider setting a pumping unit to pump back load and get a good test on the Bone Spring. Perforate Delaware 4184'-4188' (17) and 4202'-4210' (33). Set an RBP at +/-4300'. Stimulate as needed. Yates Petroleum will need approximately 3 months for Management and Owner approval.
