RE: Burnett Oil
Gissler A #23
Pit Closure

30-015-33123

Mr. Bratcher:

This is just a followup from the meeting we had on October 17, 2007. Verbal permission was granted to close the above listed drilling pit, by placing a 20 mil liner over excavation and backfilling. This was based on the depth of the site and analytical, which was reviewed.

Whenever final closure is completed, a report with photos will be submitted.

If you have any questions, please call.

Thanks,

Eddie W. Seay, Agent

Unless otherwise noted, all samples were received in acceptable condition and all sampling was performed by client or client representative. Sample result of ND indicates Not Detected, is result is less than the sample specific Detection Limit. Sample specific Detection Limit is determined by multiplying the sample Dilution Factor by the listed Reporting Detection Limit. All results relate only to the items tested. Any miscellaneous workorder information or footnotes will appear below.

Analytical results are not corrected for method blank or field blank contamination.
