13 Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Yates Petroleum Corporation plans to workover and possibly plugback and recomplete as follows: Perforate additional Morrow 8420'-8428' and 8430'-8434' (84). Stimulate as needed. If this interval is productive and compatible with the Middle Morrow, drill through composite plug at +/-8465' and tag PBTD at 8905'. If neither of the Morrow intervals are productive then proceed to set a CIBP with 35' cement above the Upper Morrow before moving uphole to the Atoka. Set a 5-1/2" CIBP at 8370' with 35' cement on top. Perforate Atoka 8298'-8304' (42). Stimulate as needed.
