Pride Energy Company is requesting an Onsite Landfarm as part of our corrective action plan, to remediate the contaminated soil from the release that occurred on March 17, 2008. The landfarm will be adequately bermed to contain any runoff fluids. The contaminated soil will be turned at a minimum once a month. Any standing fluids will be removed within 72 hours. The landfarm will be tested quarterly until closure status can be reached. The soil will not be transferred off site without the OCD's approval. No additional soils will be added to the landfarm other than what was excavated due to the above mentioned release without the OCD's approval. We have acquired the Landowners approval for the onsite remediation. Once the soil has reached closure status we will spread the soil on the well location.

*Closure standards will be 1000 mg/kg TPH, 50 mg/kg B-tex, and 10 mg/kg Benzene
