13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BEPCO, L.P. respectfully requests permission to install a high pressure gas line that will service the Big Eddy Unit #202.

The proposed gas line will consist of 4" SCH-40, 0.237 wall, welded and buried steel pipe. It will be laid from the BEU #202 wellsite in the SW 1/4 of the NW 1/4 of Sec. 24, T21S, R28E and will run SW to a point 1410.2' just inside the NE 1/4 of the SE 1/4 of Sec. 23. The gas line will then turn NW and run from that point for 2746.1' to intersect with the 8" Big Eddy Unit gas pipeline currently being constructed in the NE 1/4 of Sec. 23. (ROW number NM-119503.)

The pipeline easement has been previously arch cleared. A survey map is attached showing the proposed route of the gas line.
