13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Marathon Oil Company proposes to reroute the production from the subject well to the separator dedicated to the Comanche Federal Gas Com #1 and #2 wells at the NIBU 11 Satellite Facility located in UL "O", Section 2, T-21-S, R-23-E, Eddy County, New Mexico. Due to a misconception that the subject well was a part of the North Indian Basin Unit, this well's production was routed to the NIBU 11 Satellite Facility separator that is dedicated to the North Indian Basin Unit Lease per BLM instructions. This well is actually covered by Communitization Agreement NM SW 242, a copy of which is attached. This change will be implemented immediately upon receipt of the BLM's acceptance of this proposal.
