Subject: RE: Revised mud program

Hi Gaye,

Please find an e mail that you sent to me on 12/07/2007 with an attached revised "Drilling Fluids Proposal" that is dated on the cover letter dated of 12/07/2007.

Please note that I did not date stamp this document when I printed out.

However, please note the date we received it below.

If anyone one has issues with this please advise.

Regards,

Bryan G. Arrant

Bryan,

Please check with the game and fish and let me know when you let Mark know.

Thanks TWG

Tim:

Would you watch for the Hidalgo County APD's and let me know when they come thru. Prior to that, would you get with Game and Fish and see if there are any stipulations we need to put on the APD's to cover the species. Then let me know.

Mark

Just a quick FYI.....Game and Fish has restored desert bighorn sheep in that area. Thry've done pretty well but the species may still be on the state endangered species list. I don't know what the implications of thst are but please let me know if there are some re an APD. Thanks.

Joanna:

Here is a copy of an e-mail we received concerning exploration in Hidalgo County. Could be a big project in a relatively unexplored area of the state.

This email is in response to our conversation yesterday, regarding Dan A. Hughes Company, L.P.'s Pedregosa Basin Project in Hidalgo County, New Mexico. To give you a quick overview, we are successors in title to Fort Worth Operating Co., LLC and have currently, 172,000 acres under Lease in the area under 4 Exploration Units which are the:

Hueco South Unit

Big Hatchet North Unit

Hachita North Unit

Alamo East Unit

The Hueco South Unit is the focus of our immediate drilling program and is currently undergoing initial survey and archeological study for a 39 sq. mile 3-D seismic shoot that will begin within the next month. There are initially 3 wells that are being staked within this Unit and they all fall within T 32S R 17W and in Sections 33, 26, 25. These are conventional type wells that will test a number of expected payzones within the area. It is expected that at some point, the Percha Shale will also be target of an exploration attempt. Should you have any questions, or need any further information, please do not hesitate to call.

Robert Holder

Ed,
There is an operator that intends to drill some exploratory wells in Hidalgo County of New Mexico in the 'Boot Hill' area.
What I need from you is the is a list of geothermal wells and it's data or where to go to obtain such data.

Thanks,

Bryan G. Arrant
