RE: NMNM77046; North Pure Gold 9 Federal #11H  
330' FSL, 660' FEL, Sec. 9, T23S-R31E  
Eddy County, New Mexico

On November 4, 2008, the Bureau of Land Management (BLM) completed a field inspection on the above referenced well. 43 CFR 3162.5-1(b), states, "Upon conclusion of operations, the operator shall reclaim the disturbed surface in a manner approved or reasonably prescribed by the authorized officer." The objective for interim reclamation is to minimize the environmental impacts of development on other resources and uses.

Earthwork for interim reclamation must be completed within 6 months of well completion (Onshore Oil and Gas Order Number 1). The well to date has not been completed. The interim reclamation is to be completed by May 05, 2009. Upon completion of interim reclamation operations, the operator must submit a sundry to the BLM using Form 3160-5, when the location is ready for inspection. Final abandonment will not be approved until the surface reclamation work required in the Surface Use Plan of Operations or Subsequent Report of Plug and Abandon has been completed to the satisfaction of the BLM.
