13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Devon plans to set two 300-barrel low profile fiberglass tanks. These tanks will be used to hold filtered produced water for well workovers. Using produced water reduces expense and helps conserve New Mexico fresh water supply.
