TO: Mike Bratcher, NM OCD Dist 2

REFERENCE: Work Plan for Closure of a Temporary Pit

OPERATOR: Forest Oil Corporation

LOCATION: Lea D1

API: 30-015-05411

LEGALS: UL. B, Sec. 26, T17S, R31E

GPS: N32 48.673 W103 50.292

DEPTH to GROUND WATER: >200'

Protocols and Procedures: The closure of this work over pit will be accomplished by using the waste excavation and removal method. All contents of the pit to include the synthetic liner will be removed and disposed of at a division-approved facility. The pit will be excavated to a depth of 2' below the liner at which point soil sampling/analysis will be conducted to determine if a release has occurred. If it is determined that a release has occurred, an initial C 141 will be submitted and work will proceed until further soil analysis indicate the levels of contaminants have reached acceptable levels as per NM OCD guidelines.

Confirmation Sampling: A composite sample of the excavated area will be obtained and analyzed to determine the levels of Benzene, BTEX, TPH, GRO/DRO, and Chlorides. All analysis will be conducted using NM OCD approved analysis methods.

Disposal Facility: Controlled Recovery Inc (CRI)

Soil backfill and Cover Design Specifications: The excavated area will be backfilled to the existing grade of the location using the stockpiled material that came from the pit construction. Should additional material be required for back fill, it will be obtained from a near-by source.

Re-vegetation Plan: due to the affected area being on an active well location, no re-vegetation will be conducted.
