Leak from Tank Bottom at tank battery. At the time of spill a vacuum truck was called and 30 barrels of oil recovered. The spill was covered with fresh dirt awaiting removal of tanks and remedial action to take place.

Describe Area Affected and Cleanup Action Taken.

Leak from Tank Bottom at tank battery. Oil did trickle out of the fire wall about 30'. Removed tanks from tank battery. (see report for how deep contaminated soil was dug and hauled) (analytical reports and pictures are also attached).

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
