Burch Keely Unit #133

July 23, 2009

The location of the Burch Keely Unit #133 was found to be incorrect due to the method of measurement used when the original well was spudded in the 1940's. A meeting between Dean Chumbly of Marbob and NMOCD was held to determine an appropriate action to correct the situation. The decision reached was to correct the footages in the NMOCD's databases and to leave the original footages on the all previously submitted paperwork. A C-103 from Marbob as well as a letter from the NMOCD is put in the well file to document the actions taken. The Original footages were listed as 25-17S-29E 660 FNL & 660 FWL. These footages were amended to show a more accurate location. The correct location for the above mentioned well is **25-17S-29E 666' FNL & 645' FWL.**

A handwritten signature in black ink, reading "Jacqui Reeves". The signature is fluid and cursive, with a large loop at the end of the last name.

Jacqui Reeves

District II Geologist
