Subject: DHC application from Mewbourne: Bradley 31 Federal Com #3 30-015-36877

Hello Mr. Robin Terrell:

The Strawn gas interval you are proposing to DHC with the Atoka and Morrow apparently is part of the Undesignated West Benson Strawn Gas Pool, which was determined to be a retrograde gas reservoir in Case 13393, R-12308.

This is a bit above the complexity level we look at for administrative applications and the Division is denying this administrative application and would encourage you to apply for an examiner hearing to show evidence as to the compatibility and advisability of downhole commingling these reservoirs in this well or in any other well. Please show reservoir details such as current pressures and trend of pressures if possible.

Please provide notice of any such hearing to all operators (and if no operator, the lessees) of Pennsylvanian aged production within the boundaries of the West Benson Strawn Gas pool and 1 mile surrounding that pool and this proposed new Strawn gas spacing unit.

Regards,

William V. Jones PE
