Dear Mr. Dade:

Marbob Energy Corporation would request a testing allowable for this well for a period of 90 days. Enclosed is a C-104 for that request. This well is completed in a Bone Springs section similar to the Gravy State well located in Section 8 of T-25S, R-30E and while this well is in a different pool, their initial production rates appear similar and in excess of the pool allowable. We will be doing lab analysis and reservoir evaluation during this 90 day period in anticipation of an OCD hearing requesting an increase in allowable for both pools if the production rates continue to be strong and the engineering data would support the increase request.

If you have any questions regarding this request, please contact me.

Sincerely,

Raye Miller
