13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Marbob Enery Corporation is requesting the removal of the VRM stipulation from the original APD requiring low profile tanks. An onsite was completed on 11/5/09 with BLM personnel and it was agreed that the stipulation would be dropped. Tanks will be placed on the West side of location.

Berms will be constructed on the east and north sides of location to prevent runoff

Once well is completed, interim reclamation will include the recontouring of the bottom portion of the hill on the south side, which will reduce erosion and cut down the size of the pad

14. I hereby certify that the foregoing is true and correct
