NATURE OF RELEASE

Type of Release Produced Water	Volume of Release Unknown	Volume Recovered Unknown
Source of Release Reserve Pit	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 1Jun09
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? N/A	
By Whom? N/A	Date and Hour N/A	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
A liner failure in the drilling reserve pit caused a produced water release. This release was detected during the pit closure process by way of soil analysis (see Attached). Further excavation will continue until soil samples indicate a chloride level at or below the NM OCD limits.

Describe Area Affected and Cleanup Action Taken.*
Excavation continued to a depth of 16'BGS at which point a 5 point composite soil sample was obtained and sent to Cardinal Lab for analysis. Lab results (see attached) indicated a chloride level <1000ppm. Mike Bratcher was notified of the results and he advised that this was good for closure and he also asked that I obtain another soil sample to determine the point at which the levels dropped to <250ppm. This sample was obtained at 18'BGS and the results are attached also. Closure of the pit will proceed as per the approved work plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
