13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Forest Oil Corporation is respectfully requesting permission to recompleate the Skelly Unit 181 to the Seven Rivers and return the well to production. The well is completed in the Grayburg/San Andres and has been shut in since 2003. The former operator removed the production equipment from this well. A capital expenditure to replace the production equipment will be requested in November. This work should be accomplished in December 2009.

RE: Plug back and Recomplete NOI – Conditions of Approval

There is to be no surface disturbance beyond the existing pad. A closed loop system is to be used. H2S monitoring and protection equipment is to be on site.

Before doing any work to test or produce in the Seven Rivers, properly plug back up to the Seven Rivers.

Tag to verify depth of CIBP set to TA the well (approx 3330'). Dump bail 35' or pump 25sx on top of CIBP.

Submit subsequent report and completion report once work is completed.
