OXY request to T/A this well to allow the installation of new surface equipment and flowline structure to
safely accommodate the high levels of H2S gas. The purchaser will not accept this well's gas in its
current condition. OXY will update/rennovate an existing central facility between the Stealth, and State
W #7 to scrub the 3 wells gas of high level H2S. OXY expects this work to be completed within 1 year.

Well will be MIT and T/A'd per NMOC requirements. Notify NMOC minimum 24 hours before test.
