13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Preposal for the reclamation of P &amp; A location:

1. The existing vegetation on the location will be bladed off and stockpiled.
2. The top of the closed drilling reserve pit area will be bladed to prepair for liner installation, removed rock will be deep buried over the drilling pit area, a 20 Mil. liner will be installed over the closed drilling pit area. The liner will be "keyed" into the ground to prevent horizontal chloride migration.
3. The location will be recon-toured to match the surrounding terrain, a min. of three (3') foot of soil will be placed over the 20 Mil. liner, the removed vegetation will then be placed over the top of the recon-toured location.
4. The recon-toured location will then be reseeded using the recommended BLM seed mixture for the area.

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)
