RE: Plug back and Recomplete NOI – Conditions of Approval

There is to be no surface disturbance beyond the originally approved pad. A closed loop system is to be used. H2S monitoring and protection equipment is to be on site.

3M BOP to be used. All blowout preventer (BOP) and related equipment (BOPE) shall comply with well control requirements as described in Onshore Oil and Gas Order No. 2 and API RP 53 Sec. 17.

Formations to be abandoned with cement plugs that are a minimum of 25sx and a minimum length of 100'+10% per 1000' of depth. A CIBP can be used instead if CIBP is set 50' below the top of the formation, and 100' of cement is bailed on top. All plugs below 7500' shall be Neat Class H.

A NOI sundry must be submitted and approved before DHC.

Submit subsequent report with wellbore diagram and completion report once work is completed.

DHW 072010
