13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

RKI Exploration & Production, LLC requests to expand the RDU 22-1H pad on the east side 40 ft. or a 40 x 280 ft. expansion due to being restricted to the northwest to 130 ft. due to a drainage system. Additional room is needed that was lost to the northwest. This would be on the high side with no drainages or archaeology and would only impact the access road which will thus shorten the road.

The additional expansion is still within the 600 squared archaeologically cleared area. The original on-site was conducted by Randy Rust with the BLM. Please expedite as soon as possible due to pad being already built and rig will be moving in shortly.
